

## **PHYSIOTHERAPIST**

**Location: Fredericton, NB**

**Foundation Health Centre/Kelly Wicks Physiotherapy PC** is currently seeking a talented **Physiotherapist** to join our well established and growing team.

**Foundation Health Centre/Kelly Wicks Physiotherapy PC** puts client care at the forefront of everything we do. We are solely focused on providing positive outcomes and believe that one-on-one care, performed by a dedicated and caring team of professionals all working towards a common goal is the way to succeed.

### **Why work with us:**

You'll be an integral part of a team providing rehabilitation and treatments to our clients. Your views and ideas will be heard, and you'll play an important part in shaping the treatment plan for each patient. We respect the health and wellbeing of each of our clinicians as well, so you can expect to have regular discussions about your caseload and work-life balance so that you're in the best space to provide exceptional care.

Located in Fredericton, New Brunswick, we are a multi-disciplinary care clinic. We primarily provide rehabilitation programs to Military Veterans experiencing chronic pain (*It's our #1 Passion!!*). But we also offer rehab programs for people trying to return to work, or individual services to private clients whenever needed.

*Our team has a reputation for providing rehabilitation services that positively impacts our clients' lives. We offer competitive compensation and provide an exceptional, collaborative environment, where team-members' expertise is respected and collectively aligns to make a positive difference.*

### **Position Summary:**

The **Physiotherapist** provides physiotherapy services to individuals who have acute and chronic health conditions to enable them to achieve and maintain improved activities of daily living. You will perform assessments of clients' physical performance utilizing an evidence-based approach, then plan and implement outcome-oriented services. Additionally, the Physio is responsible for evaluating the effectiveness of the services, preparing and maintaining records, demonstrating safe and effective resource utilization and quality management.

### **Primary responsibilities:**

- Assess clients who are affected by acute and chronic health conditions by considering their personal context, goals, interests, needs, safety, environment, and resources by utilizing an evidence-based approach, reviewing records, interviewing the client, gathering information relevant to the situation and determining suitability of services to ensure physical performance issues important to the client are addressed.

- Establish and prioritize expected outcomes; discuss service implementation options; and determine sources and duration of service to meet identified short and long-term client goals.
- Plan outcome oriented physical therapy services by collaborating with the client, caregivers/family and other health care providers
- Implement physical therapy services utilizing diverse intervention approaches by carrying out the plan, engaging the client in activities associated with treatment goals, assessing, and modifying the implementation, and identifying completion criteria to promote, develop, maintain and/or restore client quality of life.

**Skills Required include:**

- Passionate about helping clients attain goals to achieve a better overall quality of life.
- Technical knowledge on ways to reduce chronic pain and associated symptoms.
- Skilled in the use of equipment and techniques appropriate to physical therapy treatment.
- Ability to identify emotional, social, or environmental barriers and intervene to eliminate stigma.
- Ability to work both independently and collaboratively as a member of an interdisciplinary team.
- Broad knowledge of other health care disciplines and their role in client care.
- Ability to communicate effectively, both verbally and in writing with clients, families, team members, other groups, and community agency personnel.
- Knowledge of the Mental Health Act as it applies to the rights and obligations of clients and staff.
- Demonstrated ability to establish workload priorities in collaboration with others in a complex health care environment.
- Basic understanding of trauma-informed care
- Basic computer literacy, knowledge of clinical standardized tests and measures.

**Minimum Qualifications:**

- Master's Degree in Physiotherapy
- Current full registration with the College of Physiotherapists of New Brunswick
- Eligible for membership in the Canadian Physiotherapy Association (CPA)

Interested applicants are invited to send a cover letter and resume to [HR@foundationhealth.com](mailto:HR@foundationhealth.com)
